

Netso Terms of Service

Introduction and Acceptance of Terms

Welcome to **Netso**, a solar energy monitoring application designed for users in Bangladesh. By downloading or using the Netso mobile app and any related services (collectively, the "Service"), you agree to these Terms of Service ("Terms"). If you do not agree with these Terms, you must not use the Service. These Terms form a binding agreement between you (the user) and **Netso** (referred to as "we", "us", or "our"). We may update these Terms from time to time, and will notify you of any material changes. Your continued use of Netso after changes are posted constitutes acceptance of the revised Terms.

Eligibility: You must be at least 18 years old (or the age of legal majority in your jurisdiction) to use Netso. If you are under 18, you may use the Service only with involvement and consent of a parent or legal guardian. By using Netso, you represent that you have the capacity to enter into a binding agreement and will comply with these Terms and all applicable laws.

Description of Service

Netso provides a platform for monitoring solar energy production and usage, calculating net metering savings, and tracking the return on investment (ROI) of solar installations. The Service offers real-time data tracking, analytics, and insights to help you understand your energy generation and consumption. All information and features provided by Netso are for **informational purposes** to assist you in managing your solar energy usage. We strive to keep the data and calculations accurate and up-to-date (including reflecting local net metering policies ¹), but **actual results may vary. Netso does not guarantee any specific energy savings or financial returns**, as these depend on external factors (such as your utility rates, solar system performance, weather, and government policies).

Please note that Netso is **not an official billing tool**. The energy and financial figures provided (e.g. estimated savings, credits earned through net metering, ROI projections) are estimates for your convenience. Always refer to your official utility bills and contracts for the exact figures. We are not responsible for decisions you make based on the information provided by the Service.

User Accounts and Security

To access certain features, you may need to create a Netso user account. When creating an account, you agree to provide **accurate, current, and complete information** about yourself (such as your name, email, and any solar system details required). You are responsible for maintaining the confidentiality of your account credentials, and for all activities that occur under your account. If you become aware of any unauthorized use of your account or any security breach, you must notify us immediately at our support contact (provided in the Contact Us section below).

You agree not to share your login credentials with others. We will not be liable for any loss or damage arising from your failure to safeguard your account information. We may assume that any communications we receive from your account have been made by you.

User Obligations and Acceptable Use

By using Netso, you agree to **use the Service lawfully and responsibly**. Specifically, you **agree NOT to**:

- Use the app for any purpose that is illegal or not permitted by these Terms. You must comply with all applicable laws and regulations of Bangladesh (including energy regulations and cyber laws) when using Netso.
- Misrepresent data or input false or misleading information into the app. (For example, do not input fake solar system data or tamper with measurements in an attempt to deceive the Service or others.)
- Attempt to **reverse engineer, decompile, or hack** the Netso app or any of its features. You must not introduce any malicious code, viruses, or harmful components into the app.
- Interfere with or disrupt the operation of the Service or the servers and networks used to make Netso available. This includes not circumventing any security or authentication measures of the Service.
- Use Netso in a way that could **harm, disable, or impair** the app or access for other users. You may not attempt to gain unauthorized access to any part of the Service or to other users' data.
- Engage in any form of data mining, scraping, crawling, or excessive automated requests to the Service that could burden our infrastructure.
- Use the Service to publish or share any content that is abusive, harassing, defamatory, obscene, or that violates any person's rights or dignity. (While Netso is primarily a monitoring tool and may not allow typical social content sharing, this clause applies to any communication or content you generate within the app, such as profile information or community forums if available.)

We reserve the right to investigate and take appropriate action (including suspension or termination of your account) against any misuse of the Service. You are responsible for any costs, losses, or legal liabilities we incur due to your violation of these Terms.

License and Intellectual Property

All software, content, and materials comprising the Netso app and Service (including but not limited to the app code, design, logos, graphics, information, and data provided by the Service) are the **intellectual property of Netso or its licensors**. We grant you a **limited, non-transferable, revocable license** to use the Netso app and Service for your personal, non-commercial use, in accordance with these Terms.

You **must not** copy, reproduce, distribute, publicly display, or create derivative works from any part of the Service **unless** expressly permitted by us in writing. Any unauthorized use of Netso's intellectual property or the Service will terminate the license granted herein. "Netso" and our logos and any branding are trademarks of our company. You are not permitted to use these marks without our prior written consent.

User Feedback: If you provide suggestions, ideas, or feedback to us about Netso, you agree that we may use and implement that feedback without obligation or compensation to you. You grant us a worldwide, irrevocable, royalty-free license to use any feedback or ideas you submit for any purpose, including improving the Service.

Privacy and Data Handling

Your privacy is very important to us. Our **Privacy Policy** (provided separately) explains what information we collect through Netso and how we use, share, and protect that information. By using the Service, you also agree to the terms of the Privacy Policy. We handle personal data in compliance with Bangladesh's laws and with respect for global data protection principles (collecting and processing data **fairly, securely, and transparently** ²).

In summary, any personal information you provide or that we collect (such as your account details or solar energy data) will be used in accordance with our Privacy Policy. We implement appropriate security measures to protect your data. However, you understand that no method of transmission over the internet or electronic storage is 100% secure, and we **cannot guarantee absolute security**. (More details on data security are provided in the Privacy Policy.)

If you do not agree with how we handle data as described in the Privacy Policy, please discontinue use of Netso.

Third-Party Services and Content

Netso may integrate with or provide links to third-party services or content for enhanced functionality. For example, the app might use third-party APIs for weather data, solar irradiance estimates, or link to government net metering portals for convenience. It might also include links to external websites or resources for informational purposes (such as solar energy guidelines or news articles). These third-party services and content are not under our control, and **we do not endorse or assume responsibility for any third-party services, websites, or information** provided by them.

Please be aware that **when you access a third-party service or content through Netso, their own terms and privacy policies will apply**. For instance, if Netso provides an option to log in via a third-party (like a social login or utility account) or fetch data from a government website, you are responsible for complying with those third-party terms. We are not liable for any issues arising from your use of third-party services, and any data you provide to third parties is at your own risk.

However, if you encounter a problem with an integrated third-party feature within Netso (for example, an external data feed not updating), you can inform us and we will attempt to resolve the issue to the best of our ability.

Disclaimer of Warranties

Netso is provided on an "AS IS" and "AS AVAILABLE" basis, without warranties of any kind. While we strive for accuracy and reliability, **we make no guarantees that the Service will be uninterrupted, error-free, or always up-to-date**. To the fullest extent permitted by law, we disclaim all warranties (express or implied) regarding the Service and its performance. This includes, but is not limited to:

- **Accuracy of Data:** We do not warrant that the energy data, calculations of savings or ROI, or any other information provided by Netso are completely accurate or reliable. The figures are estimates and informational. Actual performance of your solar system and financial savings depend on many

factors outside our control. You should independently verify important information (for example, by checking your utility bills or consulting with a solar professional) before making decisions. Netso's insights **should not be taken as professional financial or technical advice.**

- **Fitness for Purpose:** We do not guarantee that Netso will meet all your requirements or achieve any particular results. For instance, while Netso can help you monitor solar performance and savings, it may not account for every aspect of your specific installation or utility billing method.
- **Availability and Security:** We do not warrant that the Service will be available at all times or free from security breaches or viruses. Although we employ security measures, no software is completely secure or immune to bugs. You assume the risk of using the Service.
- **Implied Warranties:** Any implied warranties of merchantability, fitness for a particular purpose, or non-infringement are expressly disclaimed.

In short, you use Netso **at your own risk**. If you are dissatisfied with any aspect of the Service, your sole remedy is to stop using it.

(Some jurisdictions do not allow the exclusion of certain warranties, so some of the above disclaimers may not fully apply to you. In such cases, the disclaimers apply to the maximum extent permitted by applicable law.)

Limitation of Liability

To the extent permitted by law, **Netso and its owners, officers, employees, and affiliates will not be liable for any indirect, incidental, special, consequential, or exemplary damages** arising from or related to your use of the Service. This includes, for example, damages for lost profits or savings, loss of data, business interruption, or other intangible losses, even if we have been advised of the possibility of such damages.

In particular, we **will not be liable for:**

- **Errors or omissions** in any data or results provided by Netso.
- **Any action you take (or fail to take) based on information** obtained through the app. (For instance, if you make an investment or operational decision regarding your solar system based on Netso's projections, we are not responsible for the outcome of that decision.)
- **Incompatibilities or technical issues:** If Netso does not function correctly on your device or with your specific solar hardware/software setup, or if there are bugs, we are not liable for any resulting inconvenience or losses.
- **Unauthorized access** to your account or data (provided we have followed reasonable security practices). We cannot be responsible for damages if someone gains access to your account due to your failure to safeguard your login credentials or other faults not entirely our own.

Our total liability to you for any claims arising from the Service **is limited to the amount (if any) that you paid us for the Service in the past 12 months.** (For most users, Netso is a free app, so monetary damages cannot exceed what you paid, which is zero.) This limitation applies whether the claim is based on warranty, contract, tort (including negligence), or any other legal theory.

Exceptions: Nothing in these Terms limits or excludes our liability for gross negligence, willful misconduct, or anything that cannot be excluded under law (for example, certain statutory warranties under

Bangladeshi law, if applicable, or liability for personal injury caused by our negligence). However, we do not anticipate any such issues with a monitoring app like Netso.

Indemnification

You agree to **indemnify, defend, and hold harmless** Netso and its officers, directors, employees, and agents from and against any and all claims, liabilities, damages, losses, and expenses (including reasonable attorney's fees) that arise from or relate to:

- Your use or misuse of the Service,
- Your violation of these Terms,
- Your violation of any law or regulation (for example, if you use Netso in a manner that infringes someone's rights or violates energy regulations), or
- Any allegation that any content or data you submit to us (if applicable) infringes or violates the rights of a third party.

We reserve the right to handle our legal defense as we see fit, including choosing our counsel, and you agree to cooperate with us in defending any claim. This indemnity obligation will survive any termination of your account or of the Service.

Governing Law and Dispute Resolution

These Terms and any dispute arising from your use of Netso are governed by the **laws of Bangladesh**, without regard to its conflict of law principles. We are based in Bangladesh and operate under Bangladeshi legal and regulatory standards, including those related to digital services and data protection.

Good Faith Resolution: In the event of any dispute or concern, we encourage you to contact us first. We believe in resolving issues amicably and efficiently. You can reach out to us via the contact information in the Privacy Policy or at the end of these Terms to discuss any problem or dispute; we will attempt to resolve it in good faith.

Jurisdiction: If we cannot resolve a dispute informally, you agree that the dispute will be subject to the **exclusive jurisdiction of the courts of Bangladesh**. If applicable law requires, we may specify a particular court (for example, the courts of Dhaka, Bangladesh) for jurisdiction, but in general any competent court within Bangladesh may hear the dispute. You agree to submit to the personal jurisdiction of such courts for litigating any claims or disputes, unless we mutually agree to an alternative dispute resolution method (such as arbitration or mediation).

Please note that by agreeing to these Terms, **you are waiving any rights to claim that the courts of Bangladesh are an inconvenient forum** or to object to legal proceedings being brought in Bangladesh.

(If you reside outside Bangladesh, you are responsible for compliance with any local laws applicable to your use of the Service. However, these Terms remain governed by Bangladeshi law.)

Termination

Termination by You: You are free to stop using Netso at any time. You may delete the app from your device, and if you have created an account, you can contact us to request deletion of your account and data (see our Privacy Policy for data deletion procedures).

Termination or Suspension by Us: We reserve the right to suspend or terminate your access to the Service at our discretion, with or without notice, if we believe you have violated these Terms or if we decide to discontinue the Service. For example, if you seriously misuse the app (such as attempting to hack it or using it for fraudulent purposes), we may disable your account. We may also suspend the Service for maintenance or discontinue the app entirely (though we will give users notice via the app or other channels if we plan to shut down the service).

If your account or the Service is terminated for any reason: (a) the license and rights granted to you under these Terms will end, (b) you must stop using the app and delete it from your devices, and (c) certain provisions of these Terms that by their nature should survive will continue to apply (such as the sections on **Disclaimers, Limitation of Liability, Indemnification, and Governing Law**).

Netso is not liable to you or any third party for termination of your access to the Service. If termination is due to a breach of these Terms by you, we reserve the right to refuse re-registration or reactivation of your account in the future.

Changes to These Terms

We may update or modify these Terms of Service from time to time to reflect changes in our Service, legal obligations, or other operational needs. When we make changes, we will post the updated Terms within the app or on our website and update the “Last updated” date at the top (if provided). For significant changes, we may also provide a notice to you (for example, via an in-app alert or email, if you have provided one).

It is your responsibility to review these Terms periodically. By continuing to use Netso after updated Terms have been posted, you are agreeing to the changes. If you do not agree to the revised Terms, you must stop using the Service.

Bangladesh-Specific Compliance

Netso is developed and operated in Bangladesh, and we strive to ensure the Service complies with local laws and norms. We adhere to Bangladesh’s **digital and data regulations**, and we build our policies in line with the country’s evolving legal framework for technology. For instance, we respect the principles outlined in Bangladesh’s draft Personal Data Protection Ordinance 2025 regarding fair and secure processing of personal data ², and we operate in compliance with the Cyber Security Act 2023 and other relevant statutes.

We also aim to align with any industry-specific guidelines applicable to solar energy services. For example, if there are government or regulatory guidelines for net metering or energy data usage, we incorporate those requirements into our Service as appropriate. (As of the latest update, the Bangladesh government has

approved updated Net Metering Guidelines 2025 to encourage rooftop solar ³, and Netso's calculations are designed to be consistent with these policies.)

Users are likewise expected to use Netso in a manner consistent with Bangladeshi laws. You should not use the app in any way that would cause us to be in violation of local regulations. If you are unsure whether a certain use of the app is allowed, feel free to contact us for clarification.

Miscellaneous

- **Entire Agreement:** These Terms (along with the Privacy Policy) constitute the entire agreement between you and Netso regarding the use of the Service. They supersede any prior agreements or communications between you and us relating to the Service.
- **Severability:** If any provision of these Terms is found to be invalid or unenforceable by a court of competent jurisdiction, that provision will be enforced to the maximum extent permissible and the remainder of the Terms will remain in full effect.
- **No Waiver:** Our failure to enforce any right or provision of these Terms will not be considered a waiver of those rights. Any waiver of any provision of these Terms will be effective only if in writing and signed by our authorized representative.
- **Assignment:** You may not assign or transfer your rights or obligations under these Terms to anyone else without our prior written consent. We may assign our rights and obligations to an affiliate or in the event of a merger, acquisition, or sale of assets, or by operation of law or otherwise. These Terms will bind and inure to the benefit of the parties, their successors, and permitted assigns.
- **Language:** These Terms are provided in English. If we provide a translation in another language, it is for convenience, and the English version will prevail in case of any conflict or ambiguity in interpretation.
- **Headings:** Section titles or headings in these Terms are for convenience only and have no legal or contractual effect.

Contact Us

If you have any questions, concerns, or feedback about these Terms or the Service, please contact us:

Netso Support

Email: support@netso.com.bd (example)

Address: Netso Ltd., [123 Solar Street], [Dhaka/Chattogram], Bangladesh.

(Please note the above contact information is provided for example purposes; use the actual contact details of your company when publishing these Terms.)

By using Netso, you acknowledge that you have read, understood, and agree to these Terms of Service. Thank you for choosing Netso to empower your solar energy journey!

Netso Privacy Policy

Introduction

Your privacy is important to us. This Privacy Policy explains how **Netso** (“we” or “our”) collects, uses, shares, and protects information about you when you use our solar energy monitoring app and related services (collectively, the “Service”). Our aim is to handle your personal data **fairly, securely, and transparently** ², in compliance with the laws of Bangladesh and in line with international best practices for data protection.

By using Netso, you agree to the collection and use of your information in accordance with this Privacy Policy. If you do not agree with our practices, please do not use the app. We encourage you to read this Policy carefully to understand what data we collect and what we do with it.

(If any terms in this Policy are capitalized (such as “Service” or “Personal Data”), they have the same meaning as defined in our Terms of Service or applicable law.)

Information We Collect

We only collect information that is necessary to provide and improve the Netso Service to you. The types of information we may collect include:

- **Information You Provide Directly:** When you create a Netso account or use certain features, you may give us personal information. This can include:
- **Contact Information:** e.g., your name, email address, phone number (if provided), and password for your account.
- **Profile and Solar System Details:** You might input data about your solar setup to use the app effectively, such as your solar panel capacity, inverter type, battery storage details, location of installation (e.g., city or region for weather/solar irradiance data), and any other system settings. You may also enter your utility provider or electricity tariff details to calculate savings.
- **Feedback or Support Inquiries:** If you contact us for support or give feedback, we will collect the information you choose to share in those communications (like your email and the content of your message).
- **Information We Collect Automatically:** When you use Netso, certain data is collected automatically to help us understand how the Service is being used and to ensure it functions properly. This may include:
- **Usage Data:** Information about how you interact with the app, such as the features you use, pages or screens viewed, time spent, and other usage statistics.
- **Device and Technical Data:** Information about the device and app version you use. For example, your device model, operating system version, unique device identifiers, language preference, and app version. We may also log the date and time you access the service and any error logs or crash reports (to diagnose issues).
- **Location Information:** If you allow it, Netso may collect approximate location data of your device. For instance, knowing your general location (city or region) can help the app provide weather data or

sunlight hours for that area, which improves the accuracy of energy generation estimates. We do **not** collect precise GPS location continuously, unless you explicitly grant permission for a specific feature. Location-based data is typically derived from your inputs (like selecting your region) or basic device signals and is used solely for app functionality (e.g., tailoring calculations to Bangladesh's climate or your region's sunlight conditions).

- **Cookies and Similar Technologies:** While cookies are more relevant to websites, if Netso has a web-based dashboard or uses a browser component, we might use cookies or local storage to remember your preferences. In the mobile app, similar tracking technologies or SDKs (Software Development Kits) might be used for analytics or authentication. For example, we might use a third-party analytics tool that sets an anonymous identifier to measure usage of the app (thereby improving performance and fixing bugs).
- **Information from Third Parties:** In some cases, we might obtain information from third-party sources, but only if you use those integrations. For example:
 - If Netso allows you to import data from a third-party service (such as a smart inverter system's monitoring platform or a government net metering portal), we would access that data only with your permission and solely to provide the Service's functionality to you. The data pulled might include your energy generation readings or utility account info needed for net metering calculations.
 - If you log in via a third-party account (for example, "Sign in with Google"), we receive basic information from that account (like your name and email) as permitted by that service and as per your consent.
 - We do not purchase or collect personal data about you from data brokers or unrelated third parties.

We aim to **minimize** the personal data we collect and keep it limited to what is relevant for providing our features.

How We Use Your Information

We use the collected information for various purposes in operating and improving the Netso Service. The primary uses include:

- **To Provide and Enhance the Service:** We process your data to deliver core app functionality. For example:
 - Using your solar system input details to calculate real-time energy production, net metering credits, and ROI metrics for you.
 - Using your usage data and preferences to personalize your experience (such as showing relevant tips or configuring dashboards appropriate for a home vs. business user).
 - Remembering your settings (like preferred units or language) so you don't have to re-enter them each time.
- **Analytics and Performance:** We analyze usage and technical data to understand how Netso is performing and how users interact with it. This helps us troubleshoot problems, optimize algorithms (like improving the accuracy of savings calculations), and decide on new features. For instance, if we see many users in Bangladesh using a certain type of solar setup, we might tailor future updates to better support that scenario.

- **Communication:** We may use your contact information to send you important **account or service-related communications**. For example:
 - Sending verification emails or SMS when you register or reset a password.
 - Informing you of important updates or changes to the app, Terms of Service, or Privacy Policy.
 - Sending notifications you explicitly opt in for, such as energy performance alerts (e.g., “Your solar production today is 20% below average”) or monthly summaries. These may be sent as in-app push notifications or emails, depending on your settings.
 - Responding to your inquiries or support requests. If you email us with a question, we will use your email to communicate with you.
- **Promotional Communications: We will only send marketing or promotional content if you have agreed to receive them.** As of now, Netso’s focus is on utility, and we do not spam users with ads. However, we might occasionally inform you about new features, updates, or related services (for example, if we partner with a new solar marketplace or have a new tool). You can opt out of such communications at any time by using the unsubscribe link in emails or adjusting your notification settings in the app.
- **Compliance and Legal Obligations:** We may process and retain your information as required to comply with laws, regulations, and legal requests. For example:
 - If we believe it’s necessary to disclose data to comply with a law enforcement request or court order (see more in “How We Share Information” below).
 - To enforce our Terms of Service or to protect our rights, your safety, or the safety of others.
 - To prevent fraud, security breaches, or other potentially illegal activities.
- **Research and Development:** We may use aggregated and anonymized data (that does not identify you personally) for research purposes and to improve renewable energy services. For instance, aggregated data might help us publish insights such as average solar savings in a region (without revealing any user’s identity) or to contribute to studies that promote green technology adoption in Bangladesh.

Legal Bases for Processing: (For users interested in the legal justification, especially if international standards apply.) Our legal grounds for processing personal data typically include your **consent** (when you provide information or opt-in to features), **contractual necessity** (we process data to provide the service you signed up for), and **legitimate interests** (to improve our service, secure our platform, and communicate with you, balanced with your rights). Where we rely on consent, you have the right to withdraw that consent at any time (for example, you can disable a data collection feature you previously agreed to, such as location, via your device settings or by contacting us).

How We Share or Disclose Information

We understand that your personal information is important, and we treat it with care. We do **not** sell your personal data to third parties. We only share information in the following circumstances:

- **Service Providers and Partners:** We may share your information with third-party companies who perform services on our behalf (often called “processors” or “service providers”). These include:
- **Cloud Storage and Backend Services:** We might use reputable third-party hosting providers or cloud services (such as a data center or cloud database) to store data securely. They only process your data according to our instructions and to run the app infrastructure.
- **Analytics Providers:** We may use third-party analytics tools (e.g., Google Analytics for Firebase or similar) to help us understand app usage. These tools might automatically collect device and usage

data (as described above) for our analysis. The information shared is mostly technical and usage data, not your sensitive personal details.

- **Email/SMS Services:** If we send emails or text messages, we might use an email service provider or SMS gateway to deliver those communications.
- **Push Notification Services:** To send push notifications to your device, we use the platform's notification service (such as Apple Push Notification service for iOS or Firebase Cloud Messaging for Android). These services get the necessary info (like your device token) to send the notification but not the content of your personal data beyond what's needed for the notification.

All these service providers are contractually obligated to protect your data and use it only for the purposes we specify. They **cannot use your data for their own unrelated purposes**.

- **Compliance with Laws and Legal Requests:** We may disclose your information if required to do so by law or in response to a valid legal request. For instance:
 - In response to a subpoena, court order, or other governmental demand, if we believe disclosure is required ⁴.
 - To comply with any applicable laws or regulations (Bangladesh's laws, or international laws if they apply).
 - We will carefully review all requests and only provide the minimum necessary information. Whenever permitted, we will inform you if such a request has been made for your data.
- **Protection of Rights and Safety:** We may share information when we believe it's necessary to protect the rights, property, or safety of Netso, our users, or the public. For example, we might share data with law enforcement or relevant authorities to investigate and prevent fraud, security issues, or other harmful activities.
- **Business Transfers:** If Netso or its assets are involved in a merger, acquisition, financing, or sale of assets, or in the unlikely event of bankruptcy, your data may be transferred to the successor or acquiring company as part of that transaction. If this happens, we will ensure that your data remains subject to protections consistent with this Privacy Policy, and we will notify you of the change of ownership or transfer of assets so you can exercise any rights you may have (for example, you could choose to stop using the service if you're concerned).
- **With Your Consent:** Apart from the cases above, we will **only share your personal information with third parties when we have your consent to do so**. For example, if in the future we offer a feature where you can share your solar performance on a social network or with an energy community, we will do so only with your explicit action (such as you clicking a "Share" button to post data to a platform you choose). Another example is if you opt in to an experiment or survey that involves sharing data with a research institution – we would explain what data and with whom, and ask for your consent.
- **Aggregated or De-Identified Data:** We may share usage statistics or solar energy trends that are aggregated and do not identify you personally. For instance, we might publish a report or infographic showing "Average solar energy generated per household in Dhaka vs. Chattogram (based on Netso users)" without revealing any user's identity or specific data. Such information could be shared with industry bodies, posted on our blog, or used to promote renewable energy adoption. Crucially, this data will **not** contain personal details and cannot be linked back to you.

We want to reassure you that **we do not share your personal content (like your individual energy readings or account info) with advertisers or unrelated third parties** for their own marketing. Netso is focused on your experience, not on exploiting your data.

International Data Transfer

Netso is based in Bangladesh, and ideally, we strive to store and process data within Bangladesh when feasible. However, some of our service providers or technical infrastructure might be located in other countries. For example, if we use a cloud service like AWS or Google Cloud, the servers might be outside of Bangladesh (such as in Singapore, the US, or EU).

No matter where your data is processed, we take steps to protect it. When we transfer personal data out of Bangladesh, we ensure that adequate safeguards are in place in accordance with applicable law. This could include using contracts that require the recipient to protect the data to the standard expected by Bangladeshi law and, where applicable, international standards. We also consider the privacy laws of the destination country – for instance, if data goes to a country with strong data protection laws (like the EU's GDPR), those laws help protect your info as well.

By using Netso, you **consent to the transfer of your information to** other countries if necessary for the purposes explained in this Policy. We will always handle your information securely, regardless of location, and in accordance with this Privacy Policy. If Bangladesh enacts specific data transfer rules or restrictions (as anticipated in forthcoming data protection regulations ⁵), we will adapt our practices to remain compliant – for example, keeping certain sensitive data within Bangladesh if required.

Data Security

We employ a variety of **security measures** to protect your personal data from unauthorized access, disclosure, alteration, or destruction. These measures include:

- **Encryption:** Where appropriate, we use encryption to protect data. For example, data exchanged between the app and our servers is transmitted over HTTPS (secure SSL/TLS encryption) to prevent eavesdropping. Sensitive information (like passwords) is stored in encrypted form.
- **Access Controls:** We restrict access to personal data to authorized personnel who need it to operate, develop, or improve the Service. Our team members are bound by confidentiality obligations. We also ensure that any service providers we work with implement strong security practices.
- **Authentication and Account Security:** If the app has login functionality, we encourage you to use a strong, unique password. We do not store plaintext passwords; they are processed using secure hashing algorithms. Features like two-factor authentication (if implemented) add extra security for your account.
- **Monitoring and Testing:** We regularly monitor our systems for possible vulnerabilities and attacks. Security audits and testing (including penetration testing) may be conducted periodically to strengthen our defenses.
- **Secure Infrastructure:** Our servers and databases are protected by firewalls and located in secure facilities. We ensure that operating system and software updates are applied to address security issues promptly.

While we are committed to protecting your information, **no system can be 100% secure**. Therefore, we cannot guarantee absolute security of your data. You also play a role in security: please keep your account credentials confidential and notify us immediately of any unauthorized use of your account. If you have reason to believe your interaction with us is no longer secure (for example, if you suspect a vulnerability or that your account has been compromised), contact us right away so we can assist.

In the unfortunate event of a **data breach** that affects your personal data, we will follow applicable laws regarding notification. This means we will inform you and any relevant authorities in Bangladesh as required, and provide information on what happened and any steps you should take, in line with best practices (recognizing that currently Bangladesh law does not mandate breach notifications ⁶, we still value transparency and will act responsibly).

Data Retention

We will retain your personal information only for as long as is necessary to fulfill the purposes for which it was collected, or as required for legitimate business purposes or legal obligations.

Here's how we approach retention:

- **Account Information:** If you have an account with Netso, we keep your account data while your account is active. If you choose to delete your account or if it's inactive for an extended period, we will initiate the deletion of your data, unless we need to keep it for legal reasons. (For example, if an account has been inactive for, say, 2 years, we might reach out to confirm if you want to keep it. If not, we may delete it for privacy and storage efficiency.)
- **Solar Performance Data:** The data you generate (like historical energy generation and usage statistics) is kept to provide you with trends over time. This data will typically be retained as long as you have an account so you can access your historical records. If you delete your account or specific data entries, we will remove or anonymize those records from our production systems.
- **Communications:** If you contacted support or provided feedback, we may retain those communications (including email correspondence) for a period to ensure we have a history of support issues and for training/support improvements. These won't be kept longer than necessary—commonly, support emails might be kept for a couple of years at most, unless needed for legal reasons.
- **Legal and Backup Retention:** We may retain certain information to comply with legal obligations, resolve disputes, or enforce our agreements. For instance, if required by law to keep transaction records for a certain period (like financial records), we will do so. Also, note that residual copies of your information might persist in backups for a short duration (backups are typically cycled and purged regularly). We have measures to ensure that even in backups, the data is protected and eventually deleted or anonymized per our retention policy.

When we no longer have a legitimate need to keep your personal data, we will securely delete it or anonymize it so that it can no longer be associated with you. For example, rather than simply deleting all data points which might interfere with aggregated statistics, we might strip personal identifiers from certain historical datasets and retain the anonymized aggregates (which cannot be linked to you).

Your Rights and Choices

We want you to be in control of your personal information. Subject to applicable law (which is expected to strengthen user data rights in Bangladesh ⁷ ⁸), you may have some or all of the following rights regarding the personal data we hold about you:

- **Access Your Information:** You have the right to request a copy of the personal data we hold about you. We can provide you with a summary of your account data and usage data that is tied to your identity. (For example, information you provided on sign-up, and possibly a download of your solar performance data that we have on record.)
- **Rectification (Correction):** If any of your information is inaccurate or outdated, you have the right to request we correct it. You can also correct some information yourself via the app (for instance, you can update your profile or change your solar system details if they change).
- **Data Portability:** To the extent applicable, you may request your data in a commonly used electronic format. For instance, if you want a CSV export of your solar generation history that Netso has recorded, we will do our best to provide that to you, so you can take it to another service if you wish.
- **Deletion (Right to be Forgotten):** You can request that we delete your personal data. For example, if you decide to stop using Netso, you can ask us to delete your account and personal info. Keep in mind, we may need to retain certain information for legal or internal business purposes (as noted in the Data Retention section), but we will let you know if that's the case. When you delete the app without contacting us, your account may remain on our servers until you explicitly request deletion or as per our retention policy for inactive accounts.
- **Withdraw Consent:** If we are processing your information based on your consent (for example, if you granted permission for something optional like receiving promotional updates or sharing usage stats), you have the right to withdraw that consent at any time. Withdrawing consent will not affect the lawfulness of any processing we already performed, but it will prevent further processing of the specific data or for the specific purpose you withdraw from. For instance, you can turn off a permission (like location access) in your device, or unsubscribe from marketing emails, and we will stop those data uses.
- **Object to Processing:** If applicable law gives you this right, you could object to certain processing (like if we ever were to use data for direct marketing or a legitimate interest that you feel is not justified). Netso currently does not engage in intrusive processing, but if you have concerns, let us know and we will address them or cease the processing where required.
- **Restriction of Processing:** You might have the right to ask us to restrict or pause processing your data in certain cases (for example, while a complaint is being resolved, or if you contest the accuracy of data, we may halt usage of that data until verified).

To exercise any of these rights, please **contact us** at our support email provided below. We will need to verify your identity before fulfilling certain requests (to ensure we don't give your data to someone else). We will respond to your request within a reasonable timeframe and in accordance with applicable law.

There is no fee for making such requests, though if a request is excessive or repetitive we may charge a reasonable fee or refuse it as allowed by law.

Your Choices in the App: - You can review and update your profile information at any time within the app's account settings. - You can choose not to provide certain information (for example, you can decide not to

input optional details in your profile). Note that some features may require certain data – for instance, if you don't provide your solar system size, some calculations won't be possible. - You can opt out of push notifications or emails by adjusting your app settings or using the unsubscribe mechanism. - If location or other device permissions are involved, you can manage these through your device's settings (you have the choice to grant or revoke location, camera, or other permissions at any time).

We respect user choice and will not discriminate against you for exercising any privacy rights. Our goal is to facilitate your control over your data while providing a useful Service.

Children's Privacy

Netso is not directed to or intended for children under the age of 13. We do not knowingly collect personal information from anyone under 13 years old. In fact, since Netso is about solar energy monitoring (typically concerning homeowners or businesses), it is generally intended for adult users. If you are under 13, please do not use the app or provide any personal data to us.

If you are between 13 and 18, you should only use Netso with the involvement of a parent or guardian, and preferably under an adult's account or supervision (as per our Terms of Service eligibility rules).

If we become aware that we have inadvertently collected personal data from a child under 13 (or under the applicable age of consent in your region) without proper consent, we will take steps to delete that information as soon as possible.

Parents or guardians: If you discover that your child under 13 has created an account or provided personal information to Netso without your consent, please contact us immediately. We will work with you to remove the data and terminate the child's account if needed.

Compliance with Bangladeshi Laws

As a Bangladesh-based service, we are committed to complying with all applicable data protection and cyber laws in Bangladesh. We operate under the **Bangladesh Cyber Security Act 2023** and related regulations which, among other things, govern the lawful handling of personal "identity information" ⁹ . We ensure that we have lawful authority (such as your consent or a contractual necessity) for collecting and using your personal data, in line with legal requirements ¹⁰ ¹¹ .

Bangladesh is also in the process of strengthening its data protection regime through the upcoming Personal Data Protection Ordinance, 2025 ¹² . Netso is proactively aligning its practices with the principles of this draft law, such as: - Obtaining appropriate consent for personal data use when required. - Ensuring transparency about data collection and usage. - Respecting user rights to their data (access, correction, deletion, etc.) as highlighted earlier. - Storing certain categories of sensitive personal data within Bangladesh if mandated ⁵ (currently, Netso does not collect highly sensitive or restricted data, but we monitor legal developments closely). - Not sharing personal data without proper authorization or beyond what the law permits.

Additionally, we comply with any sector-specific guidelines relevant to our service. For instance, if the renewable energy sector in Bangladesh has rules about data sharing or customer data (such as policies by the Sustainable and Renewable Energy Development Authority), we adhere to those norms.

In summary, we treat your data in accordance with Bangladeshi privacy norms and global best practices, giving you both legal protection and the reassurance that your personal information is handled with care and respect.

Updates to This Privacy Policy

We may revise this Privacy Policy from time to time as our services evolve or as laws change. We will post any updates on this page, with a new “Last updated” date. If changes are significant, we may also inform you through the app (for example, via a pop-up notice or an email notification).

Your responsibility: We encourage you to review this Policy periodically to stay informed about how we are protecting your information.

If you continue to use Netso after a Privacy Policy update, it signifies your acceptance of the revised terms. If you do not agree to any changes, you should stop using the Service and you may request that we remove your personal data as per the “Your Rights” section.

Contact Us

If you have any questions, concerns, or requests regarding this Privacy Policy or your personal data, please do not hesitate to contact us. We are here to help and address any issues related to privacy and data security.

Contact Information:

- **Email:** privacy@netso.com.bd (example)
- **Address:** Netso Ltd., [123 Solar Street], [Dhaka/Chattogram], Bangladesh.
- **Phone:** +880-XXX-XXXXXXX (if applicable)

(The contact details above are provided for demonstration; please use your actual company contact email/address/phone when publishing.)

We will do our best to respond promptly to your inquiries. Your trust is important to us, and we are committed to ensuring your privacy is safeguarded as you use Netso.

Thank you for taking the time to read our Privacy Policy. Enjoy using Netso and empowering your solar energy journey with confidence in your data's safety!

Netso App Store Listing (iOS & Android)

App Name/Title: Netso – Solar Energy Monitor

(A concise title that includes the brand name and a hint of its function, under 30 characters for App Store compliance.)

Subtitle (iOS): Track Net Metering & ROI

(Highlights key aspects like net metering and ROI tracking, within 30 characters.)

Promotional Text (iOS):

Turn sunshine into savings! Netso helps you track solar production, net metering credits, and the ROI of your solar investment in Bangladesh – all in one app.

Description:

Meet **Netso**, Bangladesh's all-in-one **solar energy monitoring** app designed to help you maximize your solar investment and embrace green technology. Whether you're a homeowner or a business, Netso provides the insights you need to save energy and money.

Key Features:

- **Real-Time Solar Tracking:** Monitor your solar panel **energy production and consumption** live. See how much power your system generates each day and how much your home or facility uses. Clear charts and instant updates keep you informed.
- **Net Metering Savings:** Understand and track your net metering benefits. Netso shows how much excess energy you send to the grid and calculates the credits or payments you earn in BDT under Bangladesh's net metering policy ¹. Watch your meter run backwards as you contribute to the grid!
- **ROI & Financial Insights:** Keep an eye on your solar **return on investment**. Input your installation cost and Netso will estimate your payback period and total savings. Track cumulative savings and see how each sunny day brings you closer to breaking even. Financial graphs make it easy to gauge your solar project's profitability over time.
- **Analytics & Alerts:** Dive into detailed analytics – daily, monthly, and yearly summaries of generation vs. consumption. Receive helpful **alerts** and tips, such as notifications for unusual dips in production or milestones reached (e.g., "1 MWh generated!"). Netso helps you identify patterns and optimize energy use for maximum savings.
- **Localized for Bangladesh:** Built with Bangladesh's solar users in mind. Use local units and currency (BDT) for all calculations. Netso stays up-to-date with the latest **Bangladeshi net metering guidelines** (including support for single-phase and three-phase systems and direct credit payouts) ¹, ensuring your data and credits are accurately calculated according to current regulations.
- **Weather & Forecast Integration:** Plan ahead with weather-informed insights. Netso can show how sunlight hours and weather patterns affect your solar output. See tomorrow's forecasted sunshine to anticipate your next day's generation.
- **Easy Setup:** Getting started is simple – enter basic info about your solar setup (capacity, battery, etc.) and Netso does the rest. The user-friendly interface is in English (with easy language options if needed) and tailored for both beginner and tech-savvy users. Helpful tooltips guide you through each feature.

- **Secure Cloud Sync:** Sign up for an account to back up your data and sync across devices. Access your solar stats from your phone or tablet anywhere. Your data is securely stored and **privacy is respected** (we never share your personal info – see our in-app Privacy Policy).
- **Offline Mode:** Even without internet, you can log data and view recent stats. Netso will sync and update once you're back online, so you're never out of the loop.
- **Support & Community:** Got questions or need help optimizing your system? Access our support or join the Netso community forum (if available) to learn from fellow solar enthusiasts in Bangladesh. Share tips, success stories, and stay motivated on your green energy journey!

Why Netso?

- **Save Money:** Clearly see how much you're saving on electricity bills. Netso's insights encourage smarter energy use (e.g., use appliances when solar output is high) to cut costs further.
- **Earn with Solar:** With net metering tracking, celebrate each unit of energy you export. It's rewarding to watch your meter spin backwards and know you're earning credit from the utility.
- **Empower Your Investment:** Solar is a significant investment – Netso ensures you get the most out of it by transparently showing performance and financial returns. No more guessing if your system is paying off; you'll know for sure each month and year.
- **Environmental Impact: Join the green movement** in Bangladesh. Netso not only tracks watts and taka, but also can show your positive environmental impact – see estimates of CO₂ emissions avoided or equivalent trees planted thanks to your solar production. Feel good about contributing to a cleaner, greener future!
- **Built for Bangladesh:** Whether you're in Dhaka, Chattogram, or anywhere across the country, Netso speaks your language. We understand local needs, climate, and regulations. The app is optimized for Bangladesh's grid conditions and net metering rules, setting it apart from generic global apps.
- **User-Friendly Design:** Clean, intuitive interface with dark mode for late-night checks. You don't need to be an engineer to use Netso – though if you are, you'll appreciate the depth of data available. Everyone can benefit from its clear visuals and straightforward navigation.
- **Reliable and Secure:** Netso uses robust technology to ensure your data is safe. No ads, no clutter – just a focus on your solar data. We respect your privacy and security at every step.

How to Get Started:

1. Install the app and create a free account (or use in guest mode).
2. Enter your solar setup details – capacity (kW), battery (if any), and your utility tariff or net metering rate.
3. Watch your **personalized dashboard** come to life with real-time data (you can manually input readings or integrate with supported inverters/meters).
4. Explore various tabs: Generation, Consumption, Net Metering, Savings, ROI, and more. Customize what you want to see first.
5. That's it – you're all set! Keep Netso running to automatically log data, or update it with your meter readings regularly. Enjoy insights into your solar journey.

Make the most of your solar panels with Netso by your side. Whether you're a new solar adopter or a seasoned renewable energy champion, Netso is the smart companion app to power your progress. Download Netso today and take a shining step towards energy independence and a greener Bangladesh!

Promotional Summary:

Netso is the ultimate solar companion for Bangladesh, turning sunshine into savings. **Track your solar energy production in real time, monitor net metering credits, and watch your ROI grow.** Empower

your renewable energy journey with clear insights, local customization, and a commitment to a sustainable future. *Your solar story – illuminated.*
